## Part 1. How to connect the Proscenic M7 Pro to WLAN (IOS)

1. Log in to the "Proscenic Home" app

- Download "Proscenic Home" from the App Store
- Register with your email address for a "Proscenic Home" account. Select " United States of America +1". (skip this step if you already have a "Proscenic Home" account)
- Enter your username and password. Log in to your "Proscenic Home" account.

2. Add the Proscenic M7 Pro

**Remarks: Make sure that your iPhone/iPad is already connected to 2.4GHz WLAN**

2.1 Click the "ADD DEVICE" option to add a device

2.2 Select M7 Pro from the category "Smart cleaning".

### 2.3 Check the status of the machine

✚ To switch on the M7 Pro, please press the start button on the machine for three seconds until the indicator light turns blue.

✚ Please hold the two buttons for five seconds until the two lights flash blue.

#### ⏪ Check the status of the machine 1/5

1. Please check whether the robot is turned on and the indicator light is on

2. When not powering on, please press and hold the "⏻" button for 3 seconds, and the button light will light up with a boot prompt sounds, which means the boot is complete

✔ Make sure the device is turned on

next step

#### ⏪ Add a device 2/5

1. Hold "⏻" and "🏠" buttons for 5 seconds with two fingers, the machine will have a prompt sound for pairing network

2. Release your finger, and the light starts to flash slowly, which means that the WiFi hotspot is already open, you can go on with the next step.

✔ Please make sure the wifi light is flashing

next step

 Select your 2.4G WLAN (e.g. Fiona) and enter your WLAN password. Click on the "Next Step" option.

 Add your Wi-Fi network 3/5

---

Choose a network to connect to your device  
(Only supports 2.4G WIFI)

 Fiona 

 Please input your WiFi pass... 

Distribution network instructions

1. Please make sure that the WIFI password is entered correctly;
2. Please confirm whether the WIFI is 2.4G; If the home router is a dual-band router, please set the SSID name of 2.4G and 5G separately;
3. Please close the 4G traffic when binding. And after binding successfully, open the 4G traffic again;
4. Please check if the router has MAC address filtering set, or if the number of assigned IP addresses is full;
5. Try to avoid network rush hours (18:00 to 23:00) for the first time binding;
6. Please contact customer service if it is still not bound successfully;

Note: After the iPhone is upgraded to iOS13, the Wi-Fi name still cannot be obtained according to the guidance. You need to restart the iPhone or upgrade the iPhone system to the latest system;

next step

---

- Click on the "GO AND CONNECT" option. In the WIFI settings page, switch the 2.4G WLAN you are using (e.g. Fiona) to Proscenic-M7-xxxxxxx. After that, return to "Proscenic Home".

## Part 2. How to control the Proscenic M7 Pro in "Proscenic Home" (IOS)

### 1. Can the Proscenic M7 PRO draw a map? How to draw?

Yes, the Proscenic M7 PRO vacuum cleaner can map and it does so automatically during every cleaning.

#### Method:

Start your vacuum cleaner robot and it will automatically draw a map of the cleaning mission that has been done and display it in the APP.

## 2. Can I save and manage maps in the app? How do I save a map in the app and use it the next time?

Yes, you can save and manage maps in the app.

### Methods:

- (1) After the first cleaning mission of the robot vacuum cleaner, the robot will automatically save the map.
- (2) Open the Proscenic Home App and select “Restore map”. Then you will be able to find the map you had saved last time.
- (3) About the management of the map, you can rename the map, such as: garden, room, etc.
- (4) About the use of the map, select the map you want and use it. The vacuum cleaner will clean the area of the map you selected.

### Notes.

You can save 100 maps in your app for 3 months. after 3 months, all the history of the saved maps will be gone.

### 3. Can restricted areas be drawn and managed? Can to draw a restricted area that the vacuum cleaner cannot access?

Yes, you can draw and manage restricted areas.

#### Methods:

- (1) Select Custom partition management from the setting
- (2) Click the + button in the Node Manipulation option.
- (3) Select the wipe type in the options: area type, name area, e.g. garden.
- (4) A process to delineate the restricted zone is completed.

The image displays three screenshots from a mobile application used for managing a vacuum cleaner's cleaning paths. The first screenshot on the left shows the 'Settings' menu with 'Custom partition management' selected. The middle and right screenshots show the 'Custom partition management' screen. The middle screenshot shows a blue map of a house with a small green square indicating a restricted area being added. The right screenshot shows the same map with a larger green square and yellow handles for resizing, with a '2' next to the 'Area name' field. Below the maps are controls for 'node manipulation' (minus and plus buttons), 'Area name' (with a chevron), and 'Type of area' (with options: 'Restricted area', 'normal', 'depths', and 'Deep cleaning'). 'Delete' and 'Add' buttons are located at the bottom of each map view.

#### 4. Can I set a schedule so that the vacuum cleaner will work automatically? How do I set it?

Yes, you can set a schedule for your vacuum cleaner to work automatically.

**Method:**

- (1) Select the “Time setting” option in the “Settings”.
- (2) Set your desired schedule, frequency, selected area, cleaning mode, and suction speed.
- (3) The process of time setting is completed.

## 5. Is a cleaning mode available and how is it used?

Yes, there is a cleaning mode.

In your Proscenic app, there is a cleaning mode that allows you to use it.

By choosing this cleaning mode, the vacuum cleaner will not only vacuum but also clean the floor.

### Method:

Select the cleaning mode in the app.

### Remark:

When using this cleaning method, make sure the ventilator is full of water.

### Part 3. How to connect the Proscenic M7 Pro to WLAN in the (Android)

1. Log in to the "Proscenic Home" app

- ✚ Download "Proscenic Home" from the App Store
- ✚ Register with your email address for a "Proscenic Home" account. Select "United States of America +1". (skip this step if you already have a "Proscenic Home" account)
- ✚ Enter your username and password. Log in to your "Proscenic Home" account.

2. Add the Proscenic M7 Pro

**Remarks: Make sure that your phone is already connected to 2.4GHz WLAN**

2.1 Click the "ADD DEVICE" option to add a device

2.2 Select M7 Pro from the category "Smart cleaning".

### 2.3 Check the status of the machine

✚ To switch on the M7 Pro, please press the start button on the machine for three seconds until the indicator light turns blue.

✚ Please hold the two buttons for five seconds until the two lights flash blue.

#### < Check the status of the machine 1/5

1. Please check whether the robot is turned on and the indicator light is on
2. When not powering on, please press and hold the "⏻" button for 3 seconds, and the button light will light up with a boot prompt sounds, which means the boot is complete.

✔ Please confirm the machine is turned on

THE NEXT STEP

#### < Set network configuration mode 2/5

1. Hold "⏻" and "🏠" buttons for 5 seconds with two fingers, the machine will have a prompt sound for pairing network
2. Release your finger, and the light starts to flash slowly, which means that the WiFi hotspot is already open, you can go on with the next step.

✔ Please make sure the WIFI indicator is flashing

NEXT STEP

- ✚ Select your 2.4G WLAN (e.g. Honor Magic 2) and enter your WLAN password. Click on the "Next Step" option.

< Add your Wi-Fi network 3/5

Choose a network to connect with your sweeper  
(This app is supported only on 2.4GHz Wi-Fi channels)
